## NATIONAL AGRICULTURAL DAY

*The following is an excerpt of a statement released by Agriculture Secretary Tom Vilsack on March 15, 2016:*

On this National Agriculture Day, we recognize the American farmers, ranchers, and growers who do so much for our country, producing the food our children need to grow up healthy and reach their full potential.

Today, we are building a 21st century agricultural economy that is stronger and more diverse than ever before, carrying on the rural values that represent the very best of us. The greatness of American agriculture spreads across the many ways that farmers grow and raise the food we eat, and USDA supports and celebrates them all. American agriculture is making nutritious food accessible to more American children and families than ever before.

Many here in Washington, and in other parts of the country, don't always realize all that rural America does for us. Less than one tenth of one percent of Americans are responsible for growing 85 percent of our food. That gives the other 99 percent of us the great privilege of doing whatever else we want to do with our lives, which is an incredible freedom we take for granted in this country.

So today, we thank our farmers, for providing a healthy start for our children, and for contributing to ever more vibrant communities. 🐾

## 2015 YEAR END FINANCIAL STATEMENTS

The financial statements for the Administrative and Marketing Services Funds of the Pacific Northwest and Arizona Federal Milk Marketing Orders for the calendar year ending December 31, 2015, can be found on page 6. The two orders require that the market administrator conduct a marketing service program for producers who are not members of a qualified cooperative association which performs comparable services.

The primary functions of the marketing service involve the sampling and testing of milk, and providing marketing information to producers. The principal source of income for these programs is the marketing service deduction which is applicable to all producers for whom the services are provided. 🐾

# Overview of Component Tests: 2015

The market administrator's office recently published an overview of component tests of producer milk pooled on the Pacific Northwest and Arizona Federal Milk Marketing Orders. The tables summarize average tests by order, month, year, region, size-range of production, and long term trends. Producer milk values are also calculated using Federal order minimum producer prices for the respective orders at 3.5% butterfat and at test. All test and value averages are weighted averages.

The farm level data included in these tables comprises all producers and producer milk pooled on the Pacific Northwest and Arizona Orders. The data was collected from producer payrolls submitted by handlers to the market administrator's office. Components available for the Pacific Northwest Order are butterfat, protein, and other solids. Other solids are lactose and minerals. The component for the Arizona Order is butterfat. In certain months, milk production that historically qualified to be pooled on an order may not have been pooled due to price relationships. This historically eligible producer milk is **not** included in this analysis. Large changes in producer numbers and producer milk typically indicate those months when milk was not pooled due to price relationships. Small differences may be evident between published pool information and the data shown in this overview due to the use of partially audited payroll data.

The table below provides one aspect of the data included in the overview.

The overview can be found at [www.fmmaseattle.com/historicaldata.htm](http://www.fmmaseattle.com/historicaldata.htm), under Overviews of Component Tests: Pacific Northwest and Arizona Orders.
