### MARKET SUMMARIES FOR JUNE 2007

Comparisons to a year ago can be found in the tables on pages 6 and 7.

#### Pacific Northwest

Producers delivered a total of 577.1 million pounds of milk to the market during June. Daily deliveries averaged 19.2 million pounds, up 0.7 percent from May. An estimated 698 producers delivered milk to the market during the month. Daily deliveries per producer averaged 27,561 pounds, up 0.7 percent from May.

Class I producer milk during June totaled 176.7 million pounds, 30.6 percent of total producer receipts. Daily usage averaged 5.9 million pounds, down 4.6 percent from May.

#### Arizona

Producers delivered a total of 322.9 million pounds of milk to the market during June. Daily deliveries averaged 10.8 million

pounds, down 3.6 percent from May. An estimated 92 producers delivered milk to the market during the month. Daily deliveries per producer averaged 116,986 pounds, down 3.6 percent from May.

Class I producer milk during June totaled 107.8 million pounds, 33.4 percent of total producer receipts. Daily usage averaged 3.6 million pounds, down 5.5 percent from May. ♦

### Federal Order Producer Prices and Component Levels: June 2007

Producer Prices	FO124	FO131	Component Levels (%)	FO124	FO131
Uniform Price 1/*	20.19	20.30	Butterfat	3.603	3.540
Butterfat 2/	1.6457	1.6328	Protein	3.017	N/A

Skim 1/	N/A	15.11			

N/A = not applicable. \* Subject to applicable location adjustments. 1/ \$ per cwt. 2/ \$ per pound.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

**JUNE 2007 CLASS PRICES**

June 2007 non-advanced Class Prices were calculated using NASS commodity price surveys from June 2, 9, 16 and 23, 2007. Component prices for the month are \$3.7059 per pound of protein, \$1.6457 per pound of butterfat, \$0.5831 per pound of other solids, and \$1.7268 per pound of nonfat solids.

June 2007 Class III and IV prices at 3.5% butterfat are \$20.17 and \$20.76 per hundredweight, respectively. The June Class III price compared to May is up \$2.57; the Class IV price is up \$2.28. The Class III price is \$8.88 higher than in June 2006 and the Class IV price is \$10.54 higher. The Class III price at 3.67% butterfat is \$10.52 above the support price of \$9.90 at 3.67% butterfat.

Class II butterfat was announced at \$1.6527 per pound. Class I skim and butterfat and Class II skim prices for June 2007 were announced on May 18, 2007. The Class II price at 3.5% butterfat is \$18.89 for June 2007.

**FINAL: NASS COMMODITY PRICES**

	May	June	Change
Cheese*	\$1.5946	\$1.8561	\$0.2615
Butter	\$1.4290	\$1.4916	\$0.0626
Nonfat Dry Milk	\$1.6670	\$1.9012	\$0.2342
Whey	\$0.7578	\$0.7617	\$0.0039

\* The weighted average of barrels plus 3 cents and blocks.

Current Commodity Prices - - The NASS survey of cheddar cheese prices showed net increases in price received for 40-pound blocks and 500-pound barrels. The survey of 40-pound blocks showed a net increase of 13.37 cents between the June 16 and the July 14 surveys, to \$1.9957 per pound. The survey of 500-pound barrels (adjusted to 38% moisture) showed a net increase of 6.66 cents to \$1.9800 per pound.

The NASS butter price showed a net decrease of 4.82 cents between the weeks ending June 16 and July 14 from \$1.4971 per pound to \$1.4489 per pound.

The NASS nonfat dry milk showed an increase of 12.47 cents since mid-June to \$2.0389 per pound.

The average price for NASS whey showed a net decrease of 2.73 cents since mid-June to \$0.7345 per pound. ♦

**AUGUST'S CLASS I PRICE ANNOUNCEMENT**

On July 20, the August 2007 Class I price was announced at \$23.66 for the Pacific Northwest Order and \$24.11 for the Arizona Order. The Class I price was calculated using NASS commodity price surveys from the weeks of July 7 and 14.

The August Class III and IV advance skim prices are \$16.58 and \$16.74 per hundredweight, respectively. The butterfat portion of the Class I mover decreased 6.98 cents from \$1.6708 to \$1.6010 per pound.

The August 2007 Class II skim and nonfat solids prices were also announced on July 20. The skim price is \$17.44 per hundredweight, and the nonfat solids price is \$1.9378 per pound for all Federal orders. ♦

**ADVANCED: NASS COMMODITY PRICES FOR CLASS I PRICE CALCULATIONS**

	July	August	Change
Cheese*	\$1.8555	\$2.0188	\$0.1633
Butter	\$1.5125	\$1.4544	-\$0.0581
Nonfat Dry Milk	\$1.9084	\$2.0358	\$0.1274
Whey	\$0.7595	\$0.7428	-\$0.0167

\* The weighted average of barrels plus 3 cents and blocks.

**USDA ISSUES INTERIM FINAL RULE ESTABLISHING A DAIRY PRODUCT MANDATORY REPORTING PROGRAM**

Washington, D.C., June 28, 2007 – The U. S. Department of Agriculture today issued an interim final rule establishing a Dairy Product Mandatory Reporting Program as required by law. The Dairy Market Enhancement Act of 2000, and certain provisions of the 2002 Farm Bill amend the Agricultural Marketing Act of 1946 to establish the program.

The mandatory reporting program will provide timely, accurate, and reliable market information to facilitate more informed marketing decisions and promote competition in the dairy product manufacturing industry. The program will: (1) Require persons engaged in manufacturing dairy products to report certain information including the price, quantity, and moisture content where applicable, of dairy products sold by the manufacturer; and (2) Require persons storing

dairy products to report information on the quantity of dairy products stored. Under the interim final rule, USDA's National Agricultural Statistics Service (NASS) will collect the information. Any manufacturer that processes and markets less than 1 million pounds of dairy products per year is exempt from the reporting requirements.

USDA's Agricultural Marketing Service (AMS) will implement a plan to verify the price information submitted to NASS. AMS will visit butter, nonfat dry milk, cheese and dry whey manufacturers that file reports. AMS will verify that eligible sales transactions agree with information reported to NASS and will check for eligible sales transactions that were not reported.

The interim final rule will be published in a future issue of the Federal Register. Public comments are due 60 days after publication in the Federal Register. Comments may be filed by visiting [www.regulations.gov](http://www.regulations.gov). USDA will issue a final rule once public comments have been received.

For additional information about the decision contact:

### NASS: DAIRY PRODUCTS PRICES SPECIAL REPORT

On June 28, 2007, the National Agricultural Statistics Service (NASS) released a special report on revisions made to Nonfat Dry Milk prices. The text of the special report is reproduced below. The data presented in the special report can be found at:

<http://usda.mannlib.cornell.edu/usda/current/DairProdPrSpR/DairProdPrSpR-06-28-2007.pdf>.

A summary of the special report from the perspective of Federal Milk Marketing Orders follows on page 4. Additional information is provided on how to understand the revisions in the context of a dairy farmer whose milk is associated with the Pacific Northwest and Arizona Orders on page 5.

### Nonfat Dry Milk Revisions

After NASS confirmed an error in industry reporting of nonfat dry milk data, NASS issued revisions on April 13, 2007 to previously published data for the weeks of March 31, March 24, and March 17. To determine the extent of the misreporting, NASS subsequently conducted a special data validation of all qualifying nonfat dry milk plants for the period covering April 29, 2006 to April 14, 2007. As of the date of this publication, NASS has contacted all plants with sales of nonfat dry milk in order to review reporting criteria, verify previously reported data, and make any necessary revisions.

During the verification process, five firms made revisions to previously reported price and volume data for nonfat dry milk. These changes are included in this report. The revisions resulted in changes ranging from -0.8 to 8.5 cents per pound in the NASS-reported weekly average price of nonfat dry milk.

The Dairy Market Enhancement Act of 2000, U.S. Code Title 7, Section 1627, requires mandatory reporting of the price, quantity, and moisture content of butter, nonfat dry milk, cheddar cheese, and dry whey. Dairy products prices data, collected weekly by NASS, are used by USDA to assist in the determination of the fair market value of raw milk. These data are also used to implement the National Dairy Support Program.

Each week, NASS surveys plants that produce and sell more than one million pounds of nonfat dry milk annually. Specific, detailed criteria must be met for sales to qualify as usable data. Reporting rules were established to allow standard price discovery that best reflects current market conditions.

At the end of this publication are details on what information is included and excluded from the weekly reporting process of nonfat dry milk. ♦

**IMPACTS OF NASS NONFAT DRY MILK PRICE  
AND SALES VOLUME REVISIONS  
ON FEDERAL ORDER PRICES**

On June 28, 2007, USDA National Agricultural Statistics Service (NASS) published revised prices and sales volumes for nonfat dry milk (NFDM) for the weeks ending April 29, 2006, through April 14, 2007. NFDM prices as reported by NASS are used to calculate nonfat solids pricing factors used in Federal order formulas. These formulas set minimum classified prices that handlers must pay for milk pooled in the Federal order system. This report provides the impacts that these revisions would have had for the Federal order system. The following bullet points and tables highlight the differences. The full report can be found at: [http://www.ams.usda.gov/dyfmos/mib/NASS\\_Price\\_Issue\\_Publication\\_revised\\_2007-7-2.pdf](http://www.ams.usda.gov/dyfmos/mib/NASS_Price_Issue_Publication_revised_2007-7-2.pdf).

- The revised data provided by NASS cover a period of 51 weeks and would have affected the minimum Federal order milk prices announced by AMS over 14 months.
- The total classified value of milk regulated under the Federal milk marketing order (FMMO) program for the period covered by the NASS revision was understated by \$50 million, or about 0.025 percent. On a per hundredweight basis, the value was understated an average of \$0.04.
- Only the skim milk values of Class II products

(such as yogurt, ice cream, and cottage cheese) and Class IV products (such as butter, nonfat dry milk, and skim milk powders) were affected.

- Class I (bottled milk) and Class III (cheese) milk values were not affected. No butterfat values were affected in any class.
- The three FMMO markets with the greatest understatement of total classified value were the Northeast, the Mideast, and the Central markets.
- The two FMMO markets with the greatest understatement in classified value per hundredweight were the Pacific Northwest and the Arizona markets.
- Impact in a market depends on the total volume of milk regulated and the proportion of milk in the market that is Class II and Class IV.
- The average change in the 2-week price of NFDM used in advanced Class II price calculations is an increase of \$0.0218 per pound. The changes range from a decrease of \$0.0032 to an increase of \$0.0754 per pound. The average decrease in volume for the two-week period is 8.6 million pounds, ranging from 250,000 to 14 million pounds.
- With respect to the 4- or 5- week NFDM prices used in Class IV pricing, the average revision is an increase of \$0.0193 per pound.

**Impacts of NASS Nonfat Dry Milk Price and Sales Volume Revisions on Federal Order Prices  
Change in Classified Value by Market, April 2006-May 2007**

Marketing Order	Total Receipts		Total Change	
	(pounds)	(dollars)	(dollars)	(dollars/cwt)
Northeast	26,207,099,258	11,560,613		\$0.04
Appalachian	7,217,642,433	2,997,602		\$0.04
Southeast	9,346,736,677	2,676,221		\$0.03
Florida	3,732,974,652	769,212		\$0.02
Mideast	19,765,200,494	8,018,463		\$0.04
Upper Midwest	30,740,868,826	4,746,736		\$0.02
Central	14,682,769,571	6,337,677		\$0.04
Southwest	13,164,669,265	4,889,276		\$0.04
<b>Arizona</b>	<b>4,227,309,502</b>	<b>2,366,580</b>		<b>\$0.06</b>
<b>Pacific Northwest</b>	<b>8,650,140,605</b>	<b>5,419,840</b>		<b>\$0.06</b>
All Markets Combined	137,735,411,283	49,782,219		\$0.04

The changes range from a decrease of \$0.0042 to an increase of \$0.0719 per pound. The average change in volume is a decrease of 17.9 million pounds. Decreases in volume range from 250,000 to 34.6 million pounds.

- The 2-week NFDM revisions affected the Class II nonfat solids price range from a decrease of \$0.0033 to an increase of \$0.0744 per pound in the component pricing orders.
- The average difference between the previous and revised Class II nonfat solids price is an increase of \$0.0216 per pound. In marketing order using fat and skim pricing, the change in the Class II skim milk price ranged from a decrease of \$0.03 to an increase of \$0.67 per cwt. The average difference was an increase of \$0.19 per cwt.
- The 4- or 5-week revisions affected the Class IV nonfat solids price as well as a Class IV skim milk price. The changes in the nonfat solids price ranged from a decrease of \$0.0041 to an increase of \$0.0712 per pound with an average increase of \$0.0191 per pound. The Class IV skim price changes average up \$0.17 per hundredweight, varying from a decrease of \$0.04 to an increase of \$0.64.
- All FMMO pools for the period covered by the NASS revisions have been settled and all revenues have been distributed. The previously announced FMMO minimum prices remain unchanged. There are no milk order provisions that could generate additional revenues for these settled pools.
- It is possible that some milk would have been reallocated among classes of milk in the Federal order system had the NASS revisions been in effect when Federal order prices were announced. Reallocation effects have not been considered for this analysis. ♦

Source: Impacts of NASS Nonfat Dry Milk Price and Sales Volume Revisions on Federal Order Prices, USDA, Agricultural Marketing Service, Dairy Program, June 28, 2007

**ESTIMATING THE IMPACT OF NASS NONFAT DRY MILK PRICE AND SALES VOLUME REVISIONS ON DAIRY FARMERS ASSOCIATED WITH THE PACIFIC NORTHWEST AND ARIZONA ORDERS**

This article attempts to explain how a dairy farmer whose milk is pooled under the Pacific Northwest or Arizona Orders can **estimate** how the revision in NASS nonfat dry milk prices impacted the revenue received through the uniform price of a Federal order based on numbers published by USDA, AMS, Dairy programs on June 28, 2007 (See previous article). It is important to understand that any calculation can only be an **estimate** as there are numerous variables that affect the revenue a producer receives through the uniform price, including:

- Variations in the pounds of production across the 14-month period noted in the articles above;
- Variations in class price relationships;
- Variations in class utilization rates;
- Whether a dairy farmer's milk was pooled as producer milk or not in any or all months; and,
- Interactions among all of the preceding.

Assuming that a dairy farmer's milk was associated with the pool as producer milk for the entire 14-month period, an **estimate** of the impact could be calculated as the hundredweight of milk production during the period multiplied by \$0.06:

$$\begin{array}{r} \text{Milk Production for April 2006-May 2007} \\ \times \hspace{10em} \$0.06 \\ \hline = \end{array}$$

Important Note - as pointed out in the preceding article (*Impacts of NASS Nonfat Dry Milk Price and Sales Volume Revisions On Federal Order Prices*), it must be remembered that:

*"All FMMO pools for the period covered by the NASS revisions have been settled and all revenues have been distributed. The previously announced FMMO minimum prices remain unchanged. There are no milk order provisions that could generate additional revenues for these settled pools."*

1/ Restricted - Included with Class I. 2/ Due to the implementation of the Milk Regulatory Equity Act of 2005, the name of Federal Order 131 changed from the "Arizona-Las Vegas Order" to the "Arizona Order" and Clark County, Nevada, was removed from the marketing area effective May 1, 2006.

**HIGHLIGHTS THIS ISSUE:**

- Market Summaries for June 2007
- June 2007 Class Prices
- Class I Price for August 2007
- USDA Issues Interim Final Rule Establishing A Dairy Product Mandatory Reporting Program
- NASS: Dairy Products Prices Special Report
- Impacts of NASS Nonfat Dry Milk Price and Sales Volume Revisions on Federal Order Prices
- Estimating the Impact of NASS Nonfat Dry Milk Price and Sales Volume Revisions on Dairy Farmers Associated with the Pacific Northwest and Arizona Orders
- Attention: AMS Website Visitors

**ATTENTION: AMS WEBSITE VISITORS****IMPORTANT NOTICE**

At the end of July, the look, feel, and organization of the AMS website will change. The new site will contain all the information housed on the current site and more! PLEASE TAKE NOTE! If you have URLs from our current site bookmarked, they will change and will have to be reset. Thank you for your patience as we continue to work toward bringing you AMS information in the most timely and efficient manner. If you have any questions about this migration, please visit our Web Migration Questions Page at <http://www.ams.usda.gov/migrationqanda.htm> or contact the AMS Webmaster at [amswebmaster@usda.gov](mailto:amswebmaster@usda.gov).
