

# The Market Administrator's Report

*Facilitating the Efficient Marketing of Milk*

## Pacific Northwest and Arizona Marketing Areas

*William A. Wise, Market Administrator*

Volume 40, No. 10

October 2014

Data for September 2014

### MARKET SUMMARIES FOR SEPTEMBER

#### Pacific Northwest (FO 124)

Producers delivered a total of 717.0 million pounds of milk to the market during September. Daily deliveries averaged 23.9 million pounds, down 0.3 percent from August. An estimated 585 producers delivered milk to the market during the month. Daily deliveries per producer averaged 40,854 pounds, down 0.3 percent from August.

Class I producer milk during September totaled 171.2 million pounds, 23.9 percent of total producer receipts. Daily usage averaged 5.7 million pounds, up 9.7 percent from August. ▼

#### Arizona (FO 131)

Producers delivered a total of 340.3 million pounds of milk to the market during September. Daily deliveries averaged 11.3 million pounds, down 8.8 percent from August. An estimated 94 producers delivered milk to the market during the month. Daily deliveries per producer averaged 120,677 pounds, down 8.8 percent from August.

Class I producer milk during September totaled 107.7 million pounds, 31.6 percent of total producer receipts. Daily usage averaged 3.6 million pounds, up 4.4 percent from August. ▼

### UNIFORM PRICE

- ✓ Waiver of Assessments

# Federal Order Price Summaries

## FINAL CLASS PRICES

The September 2014 Final Class Prices were calculated using AMS commodity price surveys from September 6, 13, 20, and 27, 2014. Current and archived Final Class Price announcements are available at [www.fmmaseattle.com/finalprice.htm](http://www.fmmaseattle.com/finalprice.htm).

FINAL	Class I (FO124)	Class I (FO131)	Class II	Class III	Class IV	Butterfat	Protein	Other Solids	Nonfat Solids
Aug 2014	\$25.77	\$26.22	\$25.34	\$22.25	\$23.89	\$2.8448	\$3.1496	\$0.5036	\$1.6047
Sep 2014	\$25.53	\$25.98	\$26.11	\$24.60	\$22.58	\$3.2467	\$3.4991	\$0.4876	\$1.2910
Change	(\$0.24)	(\$0.24)	\$0.77	\$2.35	(\$1.31)	\$0.4019	\$0.3495	(\$0.0160)	(\$0.3137)

## ADVANCED CLASS I PRICE

The November 2014 Advanced Price was calculated using AMS commodity price surveys from October 11 and 18, 2014. Current and archived Advanced Price announcements are available at [www.fmmaseattle.com/advanceprice.htm](http://www.fmmaseattle.com/advanceprice.htm).

ADVANCED	Butterfat	Class III Skim	Class IV Skim	Base Skim	Base Class I	Class I (FO124)	Class I (FO131)	Class II Skim	Class II Non-fat Solids
Oct 2014	\$3.1410	\$13.67	\$11.66	\$13.67	\$24.19	\$26.09	\$26.54	\$12.36	\$1.3733
Nov 2014	\$3.2216	\$13.25	\$11.92	\$13.25	\$24.06	\$25.96	\$26.41	\$12.62	\$1.4022

# Commodity Price Summaries

## AMS COMMODITY PRICES FOR FINAL CLASS PRICES CALCULATION

	August	September	Change
Cheese	\$2.1074	\$2.3472	\$0.2398
Butter	\$2.5206	\$2.8525	\$0.3319
Nonfat Dry Milk	\$1.7887	\$1.4718	(\$0.3169)
Whey	\$0.6880	\$0.6725	(\$0.0155)

## AMS COMMODITY PRICES FOR ADVANCED CLASS PRICES CALCULATION

	October	November	Change
Cheese	\$2.3062	\$2.3001	(\$0.0061)
Butter	\$2.7652	\$2.8318	\$0.0666
Nonfat Dry Milk	\$1.4766	\$1.5052	\$0.0286
Whey	\$0.6747	\$0.6590	(\$0.0157)

## CURRENT COMMODITY PRICES

The AMS survey of cheddar cheese prices showed a net decrease in prices received for 40-pound blocks and for 500-pound barrels. The survey of 40-pound blocks showed a net decrease of 2.59 cents between the September 13 and the October 18 surveys, to \$2.2638 per pound. The survey of 500-pound barrels (adjusted to 38% moisture) showed a net decrease of 13.45 cents to \$2.2149 per pound.

The AMS butter price showed a net decrease of 4.27 cents between the weeks ending September 13 and October 18 from \$2.7793 per pound to \$2.7366 per pound. The AMS nonfat dry milk showed a net increase of 4.69 cents since mid-September to \$1.5147 per pound. The average price for AMS whey showed a net decrease of 1.66 cents since mid-September to \$0.6523 per pound.

A current summary of various commodity prices is available at [www.fmmaseattle.com/prices.htm](http://www.fmmaseattle.com/prices.htm). 

## October is National Cooperative Month

On September 30, 2014, Agriculture Secretary Tom Vilsack announced that the nation's farmer, rancher and fishery cooperatives set a new sales record in 2013, with total business volume of more than \$246 billion. That surpasses the previous record, set in 2012, by \$8 billion, a 4 percent gain. U.S. cooperatives also enjoyed robust job growth over the previous year.

This third consecutive year of record sales by agricultural cooperatives reflects increased sales in the overall farm economy in 2013. U.S. crop production and livestock sales both increased 6 percent in 2013, while production input (farm supply) sales increased 2 percent.

"These sales and net income records for ag cooperatives, combined with strong gains in employees for 2013, underscore the strength and productivity of the nation's farmer- and rancher-owned cooperatives. These co-ops play a vital and growing role in the nation's economy," Vilsack said.

Secretary Vilsack made the announcement to mark the start of National Cooperative Month in October. He also signed a Cooperative Month proclamation that salutes the nation's entire cooperative business sector, which includes about 30,000 cooperatives. In addition to agriculture, the nation's cooperatives play a major role in electricity and telecommunications services, credit and financial services, housing and in many other sectors of the economy.

Agricultural cooperatives also enjoyed record net income (before taxes) of \$6.2 billion, besting the previous high of \$6.1 billion, set in 2012. Cooperative income is either reinvested in the cooperative for needed improvements or returned to the member-owners. It then circulates in local communities.

In addition to marketing and processing their members' crops and livestock, cooperatives are also major players in the farm supply market. Cooperative sales of petroleum, feed, seed and crop protectants were all up in 2013. Fertilizer sales declined, the only major farm supply to see sales drop in 2013.

With grain and oilseed prices generally lower in 2014, it appears unlikely that cooperatives will set a fourth consecutive sales record when the results are tallied next year. However, livestock, poultry and dairy producers and their cooperatives will benefit from lower feed costs, which should offset at least some of the decline in revenue from grain and oilseed sales.

While 33 ag cooperatives recorded more than \$1 billion in sales in 2013, 33 percent (726 co-ops) had less than \$5 million in sales. The value of cooperative assets fell in 2013 by almost \$1 billion, with liabilities decreasing by \$5.3 billion and owner equity gaining \$4.5 billion. Equity capital still remains low but is clearly showing an upward trend, with a 15 percent increase over the previous year. Patronage income (refunds from other cooperatives due to sales between cooperatives) increased by almost 33 percent, to \$1.2 billion, up from \$900 million in 2012.

U.S. farm numbers remained about the same in 2013 as in 2012, with USDA counting 2.1 million in both years. There are now 2,186 farmer, rancher and fishery cooperatives, down from 2,236 in 2012. Mergers account for most of the drop, resulting in larger cooperatives. Producers held 2 million memberships in cooperatives in 2013, down about 7 percent from 2012. The number of cooperative memberships is slightly less than the number of U.S. farms, but this does not mean that every producer is a member of an agricultural cooperative. Previous studies have found that many farmers and ranchers are members of up to three cooperatives, so farm numbers and cooperative memberships are not strictly comparable.

## SECRETARY VILSACK APPOINTS NEW MEMEBERS TO THE NATIONAL DAIRY PROMOTION AND RESEARCH BOARD

On October 9, 2014, Agriculture Secretary Tom Vilsack announced the appointment of 13 members to the National Dairy Promotion and Research Board. All appointees' terms will begin November 1, 2014, and end October 31, 2017.

Newly appointed members are: James E. Webb, Delta, Colo. (Region 3); William R. Anglin, Bentonville, Ark. (Region 4); Kathleen A. Skiba, North Branch, Minn. (Region 5); William J. Herr, Greenwood, Wis. (Region 6); and John S. Ballard, Gooding, Idaho (Region 8).

Reappointed to serve second terms were: Kima L. Simonson, Deer Park, Wash. (Region 1); Lynda S. Foster, Fort Scott, Kan. (Region 4); Amber Horn-Leiterman, Brillion, Wis. (Region 6); Larry R. Shover, Delhi, Iowa (Region 7); Urban A. Mescher, Maria Stein, Ohio (Region 9); Celeste D. Blackburn, Jefferson City, Tenn. (Region 10); Harold Howrigan, Sheldon, Vt. (Region 12); and Kenneth E. Meyers, Warren, N.J. (Importer).

The Secretary selected the appointees from nominations submitted by eligible producer organizations, general farm organizations and qualified dairy products promotion, research or nutrition education programs. USDA's Agricultural Marketing Service monitors the operation of the Dairy Board. 🐄

## NOTICE AND REQUEST FOR COMMENTS FOR THE DAIRY PRODUCT MANDATORY REPORTING PROGRAM

A "Notice of Request for Extension and Revision of a Currently Approved Information Collection for the Dairy Product Mandatory Reporting Program" was published in the October 8, 2014, issue of the *Federal Register*.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the notice announces the Agricultural Marketing Service' (AMS) intention to request an extension and revision of a currently approved information collection under the Dairy Product Mandatory Reporting Program. The information collected supports the marketing of dairy products and is used to verify compliance with Federal milk marketing regulations.

Interested persons are invited to submit written comments via the Internet at [www.regulations.gov](http://www.regulations.gov) or to Roger Cryan, Director, Economics Division, USDA/AMS/Dairy Programs, STOP 0229-Room 2753, 1400 Independence Avenue SW., Washington, DC 20250-0229 or via email to [roger.cryan@ams.usda.gov](mailto:roger.cryan@ams.usda.gov). Comments should reference the docket number (AMS-DA-14-0068) and the date and page number of the *Federal Register* (October 8, 2014, FR60804), as well as OMB No. 0581-0274 and the Dairy Product Mandatory Reporting Program.

Comments must be received by December 8, 2014, to be considered. Comments will be made available for public inspection in the above office during regular business hours or can be viewed at [www.regulations.gov](http://www.regulations.gov). All comments received will be posted without change, including any personal information provided.

Under the Dairy Product Mandatory Reporting Program (7 CFR part 1170), various manufacturer reports are filed electronically on a weekly basis. USDA publishes composites of the information obtained to help industry members make informed marketing decisions regarding dairy products. The information is also used to establish minimum prices for Class III and Class IV milk under Federal milk marketing orders. Additional paper forms are filed by manufacturers on an annual basis to validate participation in the mandatory reporting program. USDA uses the information collected to verify compliance with applicable regulations.

The complete *Federal Register* document is available on the Market Administrator's website via [www.fmmaseattle.com/announcements/RequestForComments10082014.pdf](http://www.fmmaseattle.com/announcements/RequestForComments10082014.pdf). 🐄

## CLIMATE CHANGE, HEAT STRESS, AND U.S. DAIRY PRODUCTION

*The following is an excerpt of a report published by USDA's Economic Research Service*

### What is the Issue?

In many parts of the United States, climate change is likely to result in higher average temperatures, hotter daily maximums, and more frequent heat waves, which could increase heat stress for livestock. Heat stress is characterized by changes in respiration, heart rate, sweating, blood chemistry, and hormones. It can also alter the metabolism of minerals and water and the digestion of nutrients. Animals generally increase their water intake and reduce their feed intake. Depending on the species, heat stress can reduce meat and milk production and lower animal reproduction rates. Livestock producers can mitigate heat stress with shade structures, cooling systems, or altered feed, but these methods increase production and capital costs. Dairy cows are particularly sensitive to heat stress; higher temperatures lower milk output as well as its fat, solids, lactose, and protein content.

The U.S. Global Change Research Program recognizes that increased heat stress will increase livestock production costs, lower feed efficiency, and compromise livestock health. While the physiological and production responses to heat stress have been widely studied, there have been no attempts to quantify the costs to the U.S. dairy industry of climate change-induced heat stress. In this report, we use operation-level economic data coupled with finely scaled climate data to estimate how the local thermal environment affects U.S. dairies' effectiveness at producing outputs with a given level of inputs. We use this information to estimate the potential decline in milk production in 2030 resulting from climate change-induced heat stress.

### What Did the Study Find?

The report found evidence of a significant negative relationship between heat stress and the productivity of U.S. dairies. In 2010, heat stress lowered the value of annual milk production for the average dairy by about \$39,000, which equates to \$1.2 billion in lost production for the entire dairy sector.

## WAIVER OF ADMINISTRATIVE ASSESSMENT

On October 17, 2014, the market administrator issued a handler letter announcing that the 3.5-cent per hundred-weight administrative assessment currently applicable to the Pacific Northwest and Arizona federal milk orders will be waived for the months of October, November, and December 2014. Statements issued for those months will not contain an administrative assessment charge.

The 4-cent per hundred-weight deduction for marketing services under each of the above-named orders will continue to be deducted. This deduction, which is applicable to deliveries by producers who are not members of a qualified cooperative association performing marketing services, is to be withheld from producers in making payments for milk delivered during the month. 🐔

1/ Restricted - Included with Class IV.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
